

## TBJ Specialty Stainless Steel Casework

TBJ casework helps provide a safe, comfortable laboratory environment. Consulting with you every step of the way – from initial design and concept development, to fabrication and installation – TBJ will produce a lab that meets your exact needs. This fine combination of engineering innovation and superior construction make TBJ components easy to use, easy to clean, easy to maintain, and a real value.

Engineers at TBJ will provide floor plans showing various layouts and installation options at no cost. This service assists you in determining the best utilization of floor space, as well as the most efficient and economical locations for components based on equipment utility requirements. TBJ can also provide mock-ups prior to fabrication to help evaluate specific features, work surface sizes, and ergonomic features.

### Specialty Stainless Steel Casework

Types 304 and 316 stainless steel can be used in custom counters, cabinets, carts, and sinks. Specialty stainless steel casework can be designed to fit new or existing facilities with virtually no extraordinary renovation costs.

Customizing systems is standard practice at TBJ, not an add-on process that can significantly increase your costs. Whether you need a standard unit with multiple accessories or a customized unit, we have the comprehensive, integrated laboratory components to meet your needs.

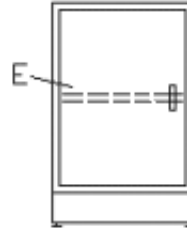

The future shape of laboratory equipment is being designed today at TBJ. Put TBJ to work for you!
